

DAVE

Directions

1. Glue this sheet to a piece of cardboard.
2. Once glue is dry, cut out shapes.
3. Make the appropriate creases. Dotted lines get folded toward you, dashed lines get folded away from you.
4. Use the reference images on the site and the guidelines on the shapes to see where they connect with each other.
5. Use tape or glue to attach the pieces to make a finished “Dave”.
6. Detail your Dave in the way you see fit. You can paint it, cover it with paper mache or plaster, glue other textures or small items to it, whatever you want.
